Egg Powder

Whole Egg Powder / Egg White Powder / Egg Yolk Powder

Egg Powder

Egg powder, spray dried

For the production of egg powder, pasteurised whole egg, egg white and egg yolk is spray dried and packaged in boxes. Egg powder can be stored without refrigeration (dry at 15° to 25° C for at least 24 months).

Mixing ratios

1 part whole egg powder + 3 parts water

1 part egg yolk powder + 1.25 parts water

1 part egg white powder + 7 parts water

Preparation tip

It is possible to mix the egg powder with other dry ingredients before adding water.
